

# LIPOBURN CAPSULES

This medication is similar to Bella Capsules in that it reduces appetite and cravings but has less ingredients. It combines a higher dose of Phentermine with Naltrexone and caffeine to enhance energy levels more than Bella Capsules. For some people a big part of losing weight is also having the energy to exercise. Lipo Burn capsules increase energy while at the same time reducing appetite and cravings.

Each Lipo Burn has different components to enhance weight loss and improve health outcomes.

## NALTREXONE CONTROLS CRAVINGS

When taken in smaller doses, low dose Naltrexone has been shown to help modulate and reduce appetite. Today, patients use low dose Naltrexone to reduce binge eating episodes, normalize appetite, and lose stubborn fat quickly.

## PHENTERMINE SUPPRESSES APPETITE

Phentermine has been the most significant ingredient for weight loss in the US since it was approved by the FDA in 1959. It is used together with diet and exercise to treat obesity, especially in people with risk factors such as high blood pressure, high cholesterol, or diabetes.

### Caffeine + Theanine

L-theanine in combination with caffeine may possess a suppressive effect on body weight increase and fat accumulation. The famous L-theanine + caffeine stack is an effective strategy to simultaneously: Acutely Boost Cognitive Performance & Enhance Thermogenesis, or Calorie-Burning. L-theanine + caffeine combo is becoming increasingly popular as it is known for “smoothing out” the caffeine experience, L-theanine helps take off the jittery edge to caffeine’s stimulatory side effects while sustaining the stimulant’s energy-boosting, attention-promoting benefits.

**Yohimbine**, an alpha 2-receptor antagonist, is a naturally occurring compound found in the bark of the Yohimbe evergreen tree of western Africa. Yohimbine is an alpha-2 antagonist, which means it blocks the message sent by alpha-2 receptors in stubborn fat cells. In other words, yohimbine tells alpha-2 cells to burn their stored body fat. Yohimbine was examined for its suitability in the treatment of obesity & studies found that it led to significantly greater weight loss and decreases in body fat.

**Chromium Picolinate** – the “blood sugar nutrient” that helps promote regular insulin function and may help to metabolize fat, turn protein into muscle, and convert sugar into energy. It supports mental focus and mental stamina, and helps relieve fatigue and enhance performance endurance and mental acuity. This is also found in Aspen Clinic’s Lipo Extreme Injection.

**DHEA** (dehydroepiandrosterone) is a hormone produced by your body's adrenal glands. DHEA functions as a precursor to male and female sex hormones, including testosterone and estrogen. DHEA production peaks in your mid-20s. In most people, production gradually declines with age, which is when you see the hormonal weight gain begin. Studies have shown that DHEA reduced abdominal fat and improved insulin sensitivity index.

**Inositol** is a B Vitamin that aids in the metabolism of fats and helps reduce blood cholesterol. Inositol participates in the action of serotonin, a neurotransmitter known to control mood and appetite. This is also found in Aspen Clinic’s Lipo Extreme & Lipo ULTRA+ Injections.

**Methionine** has antioxidant properties, reduces allergy symptoms, regulates pH balance and detoxifies heavy metals. Aids in the treatment of depression through the production of the mood-lifting neurotransmitter serotonin. This is also found in Aspen Clinic’s Lipo Extreme & Lipo ULTRA+ Injections.

**Methylcobalamin** is the most bio-available form of Vitamin B12, i.e. it is the most readily absorbed and it remains in the body for a longer period of time and at higher levels than cyanocobalamin, which means that your body is supplied with vitamin B12 longer. There are two forms of vitamin B12 that you’re likely to come across: methylcobalamin and cyanocobalamin. Cyanocobalamin is the most commonly supplemented form of vitamin B12 and is chemically synthesized. **BENEFITS:** Boost metabolism, Better Energy, Better Mood, Deeper Sleep, Heart Help, Detox. This is also found in Aspen Clinic’s Pure B12, Lipo Extreme & Lipo ULTRA+ Injections.

# LIPO BURN

<b>RX</b>
<b>LIPO BURN 1</b> Caffeine 50 mg Theanine 100 mg Yohimbine HCl 5 mg
<b>LIPO BURN 2 SR CAPSULE</b> Caffeine 25 mg Chromium Picolinate .025 mg DHEA 10 mg Inositol 25 mg Methionine 25 mg Methylcobalamin .5 mg Naltrexone HCl 8 mg Yohimbine HCl 2.5 mg
<b>LIPO BURN 3 SR CAPSULE</b> Caffeine 100 mg Phentermine HCl 20 mg Naltrexone HCl 8 mg Methylcobalamin 1 mg
<b>LIPO BURN 4 SR CAPSULE</b> Caffeine 100 mg Phentermine HCl 37.5 mg Naltrexone HCl 8 mg Methylcobalamin 1 mg
<b>LIPO BURN 5</b> Chromium Picolinate .025 mg DHEA 10 mg Inositol 25 mg Methionine 25 mg Methylcobalamin .5 mg Naltrexone HCl 8 mg Yohimbine HCl 2.5 mg

Please note that all items listed require a prescription from an Aspen Clinic physician.

These drugs are compounded specifically for Aspen Clinic patients and cannot be found at regular pharmacies.
